

**CLIENT:**  
**WESSEX WATER**

**CONTRACT VALUE:**  
**RANGE: £0.1M- £6M**

**CONTRACT TYPE:**  
**NEC3**

**SECTOR:**  
**WATER**

### DESCRIPTION OF WORK:

Working closely with Wessex Water as a framework contractor ACIEM (as Damar Group) delivered a programme of works throughout the AMP5 period.

### PROJECT HIGHLIGHTS:

Early involvement in contracts enabled us to take on in house programme management, optioneering, design and construction:

#### Sewage Treatment Works

- Avonmouth Conveyor Works (£276,000): Replacement of the existing and provision and installation of new conveyors to transport sludge around the upgraded processing plant
- Christchurch, Sludge Thickener

#### Water Treatment Works

- Sutton Bingham (£5.6m): Refurbishment of existing infrastructure and installation of plant and associated works to deliver water quality improvement

#### Pumping Station and Booster Station Upgrades

- Diagnosing operational issues, solution determination and renewal of all mechanical and electrical works and associated civil engineering for Wessex Water pumping stations

#### Filter Media Replacement

Paulton STW (£586,000) & Butleigh STW (£760,000): Refurbishment of biological filters

**AMP5 CAPITAL FRAMEWORK  
AND RESERVOIR REPAIRS**
