BOOK TARGET COST

SECTOR:
WATER

Delivering a cost effective engineering solution to increase the capacity of Princes Risborough Sewage Treatment Works in preparation for population increase projections in the area.

PROJECT HIGHLIGHTS

Replacement of the single screen inlet with a twin screen mechanism.

Conversion of a redundant sludge holding tank into a storm tank complete with additional actuated valves and scrapers.

Construction of two below ground humus tanks (18m x 15m depth) with an additional splitter chamber to distribute the increased flows evenly around the enhanced system.
